

Worktools - Organisation
1+1

Steelcase

1+1 – Minimum effort for maximum organisation

Research shows that most office workers still “pile” rather than “file”. Lack of time and inappropriate storage solutions cause people to avoid organising their workspace, all to the detriment of personal and company performance. 1+1 Worktools have been designed to revolutionise the way in which information and objects are stored and retrieved. This diverse range **facilitates easy sharing of knowledge** among colleagues, **reduces the time taken to organise workspaces** and helps users to **store more, in less space**.

- Adapts to the growing diversity of objects being stored.
- Supports needs and preferences of individuals and teams.
- Encourages visual & dynamic access to information.

Active Material used daily must be kept visible, above or at the desk.

Anticipated Material needed at least once a week should be kept at hand's reach, or close to the desk.

Archived Information and objects infrequently accessed find their place in archived storage solutions.

Description		Finishes		Description		Finishes
